

## About application parity in WhatsUp Gold v11

With each new release, WhatsUp Gold's console and web interface become more similar. Although the console and web interface are more similar in v11 than in previous releases, there are still features and functions available to one part of the application.

### Available only on the console

The following features are only available on the WhatsUp Gold v11 console:

- **Program Options.** Configure > Program Options
- **Device Types Library.** Configure > Device Types
- **Discovery.** File > Discover Devices
- **Active Discovery.** Configure > Active Discovery
- **Trap Definition Import Tool.** Tools > Import Trap Definitions
- **Database Tools.** Tools > Database Utilities > Tools
- **Recurring Reports.** Configure > Recurring Reports
- **Recurring Actions.** Configure Recurring Actions

### Available only on the web interface

The following features are only available on the WhatsUp Gold v11 web interface:

- **Workspaces.**
- **Workspace Reports.**
- **User Preferences.** Go > Configure > Preferences
- **Manage Web Server.** Go > Configure > Manage Web Server
- **Manage Users.** Go > Configure > Manager Users
- **Manage Workspace Views.** Go > Configure > Manage Workspace Views
- **LDAP Credentials.** Go > Configure > LDAP Credentials
- **IP Security.** Go > Configure > IP Security
- **Translation.** Go > Configure > Translation
- **Web Alarms.** Go > Devices > Web Alarms
- **Reports.** Go > Reports

All other features in WhatsUp Gold v11 are available both on the application's console and web interface.
