

Ipswitch continues to innovate as part of the Progress family and we are proud to release an updated version of **MessageWay Reporting**.

This release addresses a number of security issues and customer concerns in MessageWay Reporting and is compatible with MessageWay version 6.1.

Security issues resolved include:

- Issues resolved by upgrading to Apache Tomcat 9.0.10 and Java Runtime Environment 1.8.0_181
- Cross-Site Request Forgery
- Blind SQL Injection
- Instructions provided on how to enable secure connection between Reporting and the Service Interface

Enhancements to support the following:

- MessageWay Access Class function
- New export option for PNG and SVG formats
- Red Hat Enterprise Linux Server Release 7.x
- SUSE Linux Enterprise Server 12
- Windows Server 2016 Standard
- MySQL 5.7.x
- Oracle 12c (release 12.2.x)
- MSSQL Server 2016

Availability:

MessageWay Reporting version 6.1 MR02 is available now. Existing MessageWay Reporting customers with an active support agreement are eligible to upgrade to version 6.1 MR02.

To obtain a release package, or to inquire about licensing for MessageWay Reporting, please contact MessageWay Technical Support at +1 (678) 287-0700 from within North America or +44-203-137-6860 from outside North America and select the option to speak with a MessageWay Support Representative, or send an email to mwaysupport@progress.com.

Installation instructions and a complete list of issues resolved are provided via the release package README file.

Sincerely,

The Progress | Ipswitch MessageWay Team
