Progress continues to innovate, and we are proud to release an updated version of **MessageWay Web Client** on February 25, 2022.

This release addresses a number of security issues and customer concerns in MessageWay Web Client and is compatible with MessageWay version 6.1 MR03 or newer.

- Replaced Java applet with more secure WebSocket protocol enabling the following with modern browsers:
  - Large file transfers
  - Progress of transfer and status information

- Enhanced to display Web Client version number in UI

- Security upgrades include:
  - Apache HTTP Server 2.4.52 and OpenSSL 1.0.2zb
  - Ruby 3.0.2p107 and Ruby on Rails 6.1.4.1
  - Puma Web Server 5.5.2
  - Apache Tomcat 9.0.44.0
  - Java OpenJDK 11.0.10
  - Gem 3.2.22

Availability:
MessageWay Web Client version 6.1.0 is available as of February 25, 2022. Existing MessageWay Web Client customers with an active support agreement are eligible to upgrade to version 6.1.0.

To obtain a release package for MessageWay please contact MessageWay Technical Support at +1 (678) 287-0700 from within North America or +44-203-597-6907 from outside North America and select the option to speak with a MessageWay Support Representative, or send a request (Support tab | Login | CREATE CASE) via https://www.progress.com/support/messageway

Installation instructions and a complete list of issues resolved are provided via the release package README files.

Sincerely,
The Progress MessageWay Team
