MessageWay

Progress continues to innovate, and we are proud to release an updated version of **MessageWay** on January 21, 2021.

This release addresses a number of security issues and customer concerns in MessageWay and is compatible with MessageWay version 6.1.

Security upgrades include:
- SHA-2 Support
- libSSH upgraded to 0.9.4
- OpenSSL upgraded to 1.0.2u

Enhancements to support the following:
- New MWRules source InputName
- New MWRules operators beginswith, endswith & matches (RegEx)
- New mwadmin option to sync message counters in the Manager
- Configurable Ciphers, KEXs & HMACs for MWSFTP Adapter
- New and improved ODBC driver for Oracle using DataDirect
- Windows Server 2019 Standard & MSSQL Server 2019

Availability:
MessageWay version 6.1 MR09 will be available on January 21, 2021. Existing MessageWay 6.1 customers with an active support agreement are eligible to upgrade to version 6.1 MR09.

To obtain a release package for MessageWay please contact MessageWay Technical Support at +1 (678) 287-0700 from within North America or +44-203-597-6907 from outside North America and select the option to speak with a MessageWay Support Representative, or send a request ('Log a Case') via
https://www.progress.com/support/messageway

Installation instructions and a complete list of issues resolved are provided via the release package README files.

Sincerely,
The Progress MessageWay Team
